REMARKS

Claims 1, and 2-12 remain, claim 3 being cancelled and claims 11 and 12 withdrawn as directed to a non-elected invention.

Claim 1 is proposed to be extensively amended to correct the informalities noted by the Examiner and to be clearer in other respects. Claims 7 and 9 are also proposed to be amended to correct informalities noted.

Claim 1 as amended is also believed to better distinguish over the Lapeyre '478 as it clearly recites the adjusting rotation of the mounting element while in position against the wall. The Examiner pointed out that the element of Lapeyre could be rotated once completely removed from the wall.

Accordingly, since the claims are placed in better form and distinguish clearly over the prior art, entry of the amendment is urged to be proper.

Such action is respectfully requested.

Respectfully submitted,

By:
